

Business Systems Analysis Certificate

This comprehensive program has been delivered to hundreds of participants in the past twelve years, and is consistently rated as Excellent. The program combines rich theories with practical examples and case studies to ensure that participants fully understand how to apply learned techniques in their daily work, and thus bring success to their projects and careers.

OUTLINE

The certificate program is 60-hour long and addresses the major aspects of Business Analysis and Software Requirements Engineering. The program is composed of the following five courses:

- BA-01 Fundamentals of Business Analysis (12 hours)
- BA-02 Requirements Analysis (24 hours)
- BA-03 Requirements Communication (9 hours)
- BA-04 Requirements Discovery (9 hours)
- BA-05 Requirements Management (6 hours)

The program was fully endorsed by the IIBA for ten years, and grants 60 credit units towards certifications. The content is based on BABOK 3.0, and covers the following knowledge areas:

- Chapter 3: Business Analysis Planning and Monitoring
- Chapter 4: Elicitation and Collaboration
- Chapter 5: Requirements Life Cycle Management
- Chapter 7: Requirements Analysis and Design Definition
- Chapter 9: Underlying Competencies
- Unaddressed Chapters: Chapter 6: Strategy Analysis & Chapter 8: Solution Evaluation
